

WHICH IS WHICH? AUTOMATING SPORTS IMAGE CLASSIFICATION

Presented by: Patrick M. Ryan

BUSINESS UNDERSTANDING

- Initial step.
- Automatic retrieval of information.
- Important to establish a methodology.

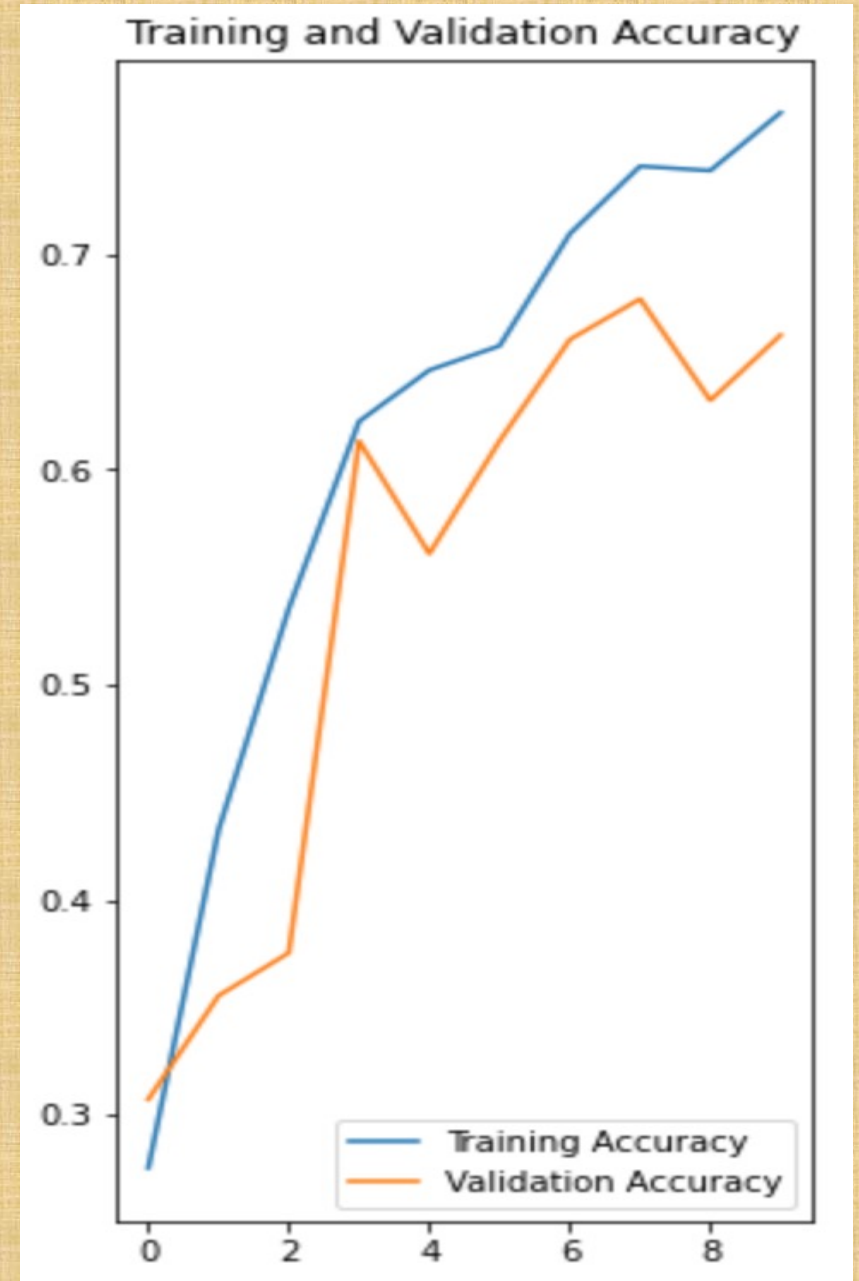

DATA UNDERSTANDING

- GitHub - jurjsorinliviu
- Working with around 6500 images.
- 7 categories.
- Clean up images.

MODELING

- Used a Convolutional Neural Network (CNN).
- Accuracy score: 72%

EVALUATION

Mookie Betts – Los Angeles Dodgers

- Checked against random sample from internet.
- Dataset had no reference on this image.

RECOMMENDATIONS

- Using a model that automatically classifies images saves time and boredom.
